Summary

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Database Management Systems. Experienced in backend development using Java, Spring Boot, RESTful APIs, and SQL, and in building full-stack applications with Node.js, Express.js, and JavaScript. Solved problems on Competitive Coding platforms, demonstrating strong problem-solving, debugging, and system design fundamentals. Seeking Software Engineer / SDE roles to build scalable, production-quality software.

Technical Skills

- **Languages:** Java, JavaScript, Python, C
- **Backend & APIs:** Spring Boot, Spring MVC, Node.js, Express.js, RESTful API Design, JSON, HTTP, CRUD Operations, Authentication (OTP/JWT)
- **Frontend:** HTML5, CSS3, JavaScript (DOM Manipulation, Responsive Design)
- **Databases:** SQL, Oracle, Relational Database Design
- **Core CS Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Ubuntu/Linux, Power BI
- **Practices:** Agile Collaboration, Debugging & Testing, Version Control Workflows, Code Reviews

Experience

Freelance Full-Stack Developer – Dwaraka

2025

- Designed and developed a production-ready restaurant website end-to-end using HTML5, CSS3, and vanilla JavaScript, translating client requirements into a live business website
- Modularized the codebase into 11 CSS and 12 JavaScript components to improve maintainability, readability, and scalability
- Implemented accessibility improvements and SEO assets (robots.txt, sitemap.xml, structured metadata), and built a smoke-test suite that caught and fixed a production import bug pre-launch

Projects

NewsSnap – AI-Powered News Aggregator & Intelligence Platform

- Built a full-stack news aggregation platform with Node.js, Express.js, and a RESTful API architecture, serving multilingual content to end users
- Integrated Google News RSS feeds with server-side caching to reduce redundant API calls and improve response times
- Implemented OTP-based authentication, multilingual translation, YouTube search integration, bookmarking, and theme customization

Collaborative Task Management System (Java, Spring Boot)

- Engineered a team-based task management web application using Java, Spring Boot, and RESTful APIs with full CRUD functionality
- Designed and integrated a normalized SQL database schema for persistent task, user, and team data storage
- Followed Git-based collaborative development workflows across the project lifecycle

ProfileDekho – Competitive Coding Profile Aggregator (Java, Spring Boot)

- Developed a REST API-based platform aggregating coding profiles across LeetCode, Codeforces, CodeChef, HackerRank, InterviewBit, and GitHub into a single dashboard
- Implemented authentication endpoints, profile management, CORS configuration, and JSON-based data handling for reliable third-party API integration

Problem Solving & Achievements

- Solved 300+ Data Structures & Algorithms problems across LeetCode and other competitive programming platforms, covering Arrays, Strings, Linked Lists, Trees, Hashing, Stacks, and Queues
- Cleared the qualifying coding round of the JPMorgan Chase Code for Good Hackathon, ranking among the top performers in the assessment
- Maintained a CGPA of 9.17/10 while balancing coursework and independent project development

Education

CVR College of Engineering

CGPA: 9.17/10

Bachelor of Technology in Computer Science and Engineering

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Certifications

Generative AI (GeeksforGeeks) | Data Science Bootcamp (GeeksforGeeks) | Data Science Master Virtual Internship – AICTE, Ministry of Education & Altair (Grade: Outstanding)
